Our present Newsmen will please take notice of this rule, as it will be inflexibly adhered to.

The Decision of the Supreme Court of this State, on the application for the Release of McLEOR, was made at Utica yesterday. The Assistant Editor of this paper was present to report the Opinions of the Jedges, and will return with them to this City as fast as steam can bring him. He will probably be here at 5 o'clock this evening; when we shall decide from the length and importance of the Opiniors whether to issue them immediately in an Extra, or await the regular appearance of our paper next morning. Our readegs may count on receiving them in their next paper with

THE RATIO.-The Richmond Whig moderately but firmly opposes our proposition that the Ratio of Representation for the next ten years be raised to 90,000 and the Federal Home thereby cut down to 150 Members. It urges that a numerous House will not be so so easily rendered subservithat the former will more closely reflect the popular will, and that the cylls of interminable debate, waste of time and disorder must inevimbly work out their own cure. It says nothing respecting the comparative expense-but we caive comment, and give these considerations for whatever

FUGITIVES FROM JUSTICE,-The Legislature of New-Hampshire, before its recent adjacenment, passed the following Joint Resolution-in the House by a vote of 160

" Resolved, That the refusal of one State to surrender a person charged with the commission of a crime within another. State, and who shall fee from justice, is in open discepted of the plain letter of the Constitution, subversive of the peace and harmony of the Union, and destructive of the ends for which the Federal Constitution was established."

The newspapers are all approving this with all their neights; but it is remarkable that nobody does what all commends. The first rebel was Gov. Dunlap of Maine -- a Loco-Foco. Then came Gov. Kent, Whig, and Gov. Fairfield, of opposite politics, but none of them surrender the persons charged with the commission of a crime" in Georgia. We wish some County Grand Jury in Arkansas would just 'charge' the 160 with 'the commission of a crime'-Abelition, for instance-and see Gov. Page hand them over. They would begin to think that the provision of the Constitution referred to, finds a limitation in common sense, and manifest justice the same as any other.

Our friend "H." who writes to lecture us for publishing accounts of murders and other crimes, might as well ask us not to publish a daily paper at all. We try to print as pure a paper as possible, and to keep out of sight the revolt og and herrible as far as possible; but the occurrences of the day esmoothe wholly suppressed. We never dress up crimes or vices in an attractive garb, nor do we pick up every story we can find calculated to bring the Christian Ministers and Church into discredit and contempt, as another penny paper does; but if a murder or other crime is committed, we stuthe facts as purely and forbiddingly as possible. Does ' H. venture to read the Bible !

107 "An Enemy to Underhand Movements" wishes us to publish the memorial of "our principal Merchants" against a General Bankrupt Law, and hold its authors up to public indigentian. We see no necessity for this. The memorial has been pretty well circulated already, and public opinion very feely expressed with regard to it. The memorialists had a perfect right to express their own opinions; so they and to write privately, if they chose. We consider that quite judicious in this case. But they had no right to speak in the name of "the solvent classes," and their assumption to do so we have already treated as it deserved. Enough of this.

ICF The Illinois State Register abuses Hon. DANIEL G. GARNSEY, the new Land Office Register at Dixon in that | ment of our correspondent in that City that " Flour had been State, as "a furious, brawling, vandictive Anti-Muson," elected to Congress as such from this State and then east aside. Just the contrary of this fact. Judge Garnsey was elected to Congress from this State in 1826 on his own morits, having no party nomination, and was thrown out in 1823 because he was not and would not be an Anti-Mason. Whether his being so would have constituted an objection to him is a matter of opinion, but a lie is a lie, whether properly

HARRISON.

WHAT SHALL BE DONE FOR THE LABORER!

We have already glanced at the gradual but mighty change in the condition and character of the great mass of mankind which has step by step clevated the Day-Laborer from a three or more wives off-hand; one in Ohio; the second in rightful aspirant to Fortune, Honor and Power-not by some third near Springfield, Illinsis, after having been engaged to such lucky accident or transcendest ability as, once in a century, sufficed to raise one of his ancestors out of the miresubscribers for a box by the honest, patient, beneficent exertion of the faculties God has given him. This change has not yet reached of May, and has probably another pretty well courted in its end. We are still in a state of transition. The great lows by this time. We hate to say an ill-natured thingmass of mere Laborers in our day are indeed better fed and Grounds Recovering late Newman for this paper at Utica, has abstracted, owing us over \$160, and plandering others who had trusted thin to nearly or quite an equal acount. J. J. Forma, late Nowsman at Schemetady, has also taken to the lander, owing us over \$30, partly for papers we bought for him and notified mands and sealer cash for. He has so indied other publishers in like manner. He ran away on Therday last, without giving us not like, and suffered our papers to accumulate for several days thereafter. I. The serious losses we have sustained in the above and other instances constrain us to establish an inflexible rule that we will hence- Femule Labor, and of course improved the condition of those who live by it. Throw out these, and look earnestly at the condition of the mass of Poor Women. Are they any better si unted than were the same class ten centuries ago?-or rather, could the latter have been in worse condition! We have known the time when even is New-England the average price of Female Labor did not exceed seventy five cents per week-out of which all clothing was to be provided, and every expense paid except bare board. And for this miserable pittance Young Women were required to lafor from their feurteenth or fifteenth year to their marriage or death, without an hour for study or mental improvemen -plodding through a round of menial and often disgusting coupations day after day, with scarcely modification, carely ever a remission of their duties even on the Sabbath, hat day of rest for even the beasts of the field. With the necessed demand for and varied employment of Female Laor in that section, the privileges and consideration of that class have signally improved; but the circumstances we have and nominally free, in our Country at this moment; and wice as many more are liable to be reduced to it at any me tion of Young Men who inherit no advantages is better than this; most of them may, by prudence, wisdom, and a proper disposition, secure a comfortable, reasonably independen livelihood and a sound, sufficient, practical Education be tween the ages of fifteen and twenty-one. But with them narringe is often a change for the worse, in a worldly aspect and the father of a large family of dependent children toils. on from dawn to dark, without time for reflection or improvement, barely able to provide food and shelter for those whom Providence has confided to his care,

We have stated these facts simply to correct a very connon and pernicious error which assumes that the evils which afflict the Poor are such as might be entirely removed by conomy, temperance and industry on their part. Many a well-meaning but not closely observing or profoundly thinking man and woman resist the conviction that they eight to do something to ameliorate the condition of the indigent by beneving, or trying to believe, that the privations of the Poor are entirely the result of their folly or their vices. This opinion must be eradicated. Undoubtedly if all vice, unthrift and idleness could be expelled from the land, destitution and misery would soon follow. Undoubtedly, the utter annihilation of Intexiencing Liquors alone would sweep off one-half the privation and suffering to which the Poor are now subcet. And it may be very true, in most instances, that if persons slid just as they ought they would not be famished or degraded. But is it any consolation to the child now famishing to know that if her father had not been a drunkard she might now be living in abundance? Does it reconrile the mother to the turning of her children into the street hat if the father had not been a spendthrift the rest might have been paid ! Vice and Dissipation must indeed be eradicated, or Want and Misery cannot be; but our easy-chair Philanthropists begin at the wrong end. They leave the child without bread or proper instruction, and frowningly tell it not to steal. They turn off the man without employment, essurce or hope, and bid him not to drink. Can they effect a thorough Reform by such means? Never!-There must be und are better remedies for the woes of Humanity, as we shall endeavor hereafter to demonstrate.

One was form about 20 miles below this, at Washington Grove. M Campbell was actively engaged in getting it up. On Sunday night last, two of the Driskells, notorious through this region as ringleaders and harborers of all sorts of villains, rode up to Campbell's house and asked his son if his father was at home; he called his father to the door, when the Driskells shot him dead and fled. The volunteer companies of De-Kalb and Winnebago Counties immediately collected and went in search of the Driskells. On Tuesday they caught the old man and one of his sons-tried them by Lynch law, and were convinced that they were the cause if not the per-petrators of the attochous murder of Mr. Campbell. They sentenced them to immediate death, then placed the old man about ten rods off, and hade him prepare for death, giving him five minutes; when the time reas up, about hity balls went through him. The son was then served in the same manner—both devils proving game—neither making any dis-closures, more than saying that another son of Driskell killed Campbell. The company are now pursuing this other Dris-kell, who has cut stick with a confederate; \$500 reward is offered for his head. High-handed and revolting as this summary mode of procedure seems to be, it is, nevertheless, absolutely necessary, and receives the commendation of every individual who is at all acquainted with the facts. If a man efuses to join these companies, he is put down at once with

"The Rockford paper will bring all the minutin of the affair.

Perhaps the worst feature of this horrible affair is the apsearance of the following comments, appended to the above by the Chicago American-a journal usually favorable to law and order:

"We are inclined, under all the circumstances, to justify this violent out-break of popular isdignation. When thieves, scoundrels and vindictive and cowardly assassins-having no stake in the country, nor no principle or manly feeling in their hearts—despising and evading the laws of God and man—civil and moral—outlaws having nothing valuable to risk and every thing to gain by their atrocities—when such villains prowl our streets and outrage the law not only of the Statue, but every principle of civilized humanity, the slow and uncertain retribution of the legal code in its operation, itself the sport of technicality, of perjury and every species of corruption -- seems, indeed, a mockery, and the ghost of principle and the blood of victims cry loud, long-plausibly. (may we not say justly,) for swifter, deeper vengeance!
